M-BUS Terminal

MODE LIGHTING
CONTROLLING THE FUTURE OF LIGHTING

Key Features

- M-BUS connection device.
- DIN Rail Mounted.
- Automatic isolation when using two DIN-PSU power supplies.
- Complies with EC EMC and Low Voltage Directives (CE).
- 2 year warranty.

The MBUS-INT-TERM-RJ45 is a useful connection device for eDIN+'s M-BUS communication bus.
The device is DIN rail mounted and provides a simple connection between hard wiring and RJ45 connectors.

When two DIN-PSU power supplies are connected on one M-BUS network the A wire between the two supplies must not be connected. The MBUS-INT-TERM-RJ45 provides the isolation automatically between the IN connection and the OUT connection.
